

OUR SERVICES

1. AIRCRAFT GUARDING, SEARCHING AND ACCESS CONTROLS

In addition to access controls at the aircraft, our services also include searching aircraft for prohibited items and guarding parked aircraft during their stay on the Brazilian ground.

2. PASSENGERS AND BAGGAGES SCREENING

GRYPEN screens carry-on baggage for explosives and other dangerous items. We also screen checked bags for explosives and other dangerous items. After check-in, baggage can be turned over to **GRYPEN** for a security inspection.

Once the screening process is completed, the checked baggage are protected to prevent the introduction of any objects. We also monitor the handling of baggage by third companies to prevent the introduction of any objects before and during embarking.

3. CARGO SECURITY

GRYPEN implements specific control measures of on-board freight in international flights. These missions usually entail the use of **Explosive Detection Dogs (EDD/K9)**, **X-Ray** or Explosive Traces Detectors (ETD). Once the screening process is completed, the checked cargo may be protected and escorted to the plane to prevent the introduction of any objects.

4. DETECTION DOGS | K9 SERVICES

GRYPEN is the Brazilian specialist in the selection and training of detection dogs. Our dogs and handlers receive the highest quality trainings, using methodologies and substances internationally approved by the civil aviation regulatory agencies of the United States and the European Union. All of our dogs and handlers are certified by the **American Working Dog Association** (www.americanworkingdog.com) to ensure that our K9 teams comply with the strictest international standards.

Since 2015, **GRYPEN** has developed a solid expertise in the field of aviation security for international flights to become a recognized specialist in the Brazilian market, especially in canine (K9) detection.

GRYPEN provides airlines with robust security solutions that meet the highest quality standards inspired by the **European and American Aviation Regulations**. Our **120 employees** deployed in several airports in **Brazil** are highly qualified and specially trained in accordance with the **Brazilian Aeronautical Code**.
